

NAVED A. SAYYED

React Native | Next.js | React — Full Stack Developer

Nashik, Maharashtra | +91 9356559922 | navedas9356@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

React Native full-stack engineer who builds and ships production mobile and web products end-to-end — from TypeScript React/Next.js interfaces to Supabase/Postgres backends, real-time sync, and Android releases. Specializes in the mobile product layer: offline-capable clients, row-level security enforced in the database, and reliable push notifications. A high-ownership builder who takes a problem from an empty repo to an app people actually open.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Frontend:** React, Next.js, Redux Toolkit, Zustand, Tailwind CSS
- **Mobile:** React Native (CLI, Expo), Firebase Cloud Messaging, Play Store Release
- **Backend & APIs:** Node.js, FastAPI, REST APIs, WebSockets, JWT/OAuth
- **Database & Cloud:** PostgreSQL, Supabase, Row-Level Security, Cloudflare Workers
- **AI Integration:** LLM API integration, multi-agent orchestration (LangChain/LangGraph)
- **Testing & Tools:** Jest, Postman, Git, GitHub Actions (CI/CD)

EXPERIENCE

COSA, GCOERC

Jun 2024 – Aug 2025

Technical Head (Student Community)

Nashik, India

- Built and shipped cosagcoerc.com in React and Redux Toolkit — event registration and management for 1,000+ students.
- Sole technical owner across consecutive event cycles, including live-event support and fixes shipped mid-event.
- Automated deployment with GitHub Actions, replacing manual releases.

11 BRD, Indian Air Force

Dec 2024 – Jan 2025

Technical Intern

Nashik, India

- Developed a real-time production status tracking system for the Electronics Bay, automating the unit's Excel-based reporting with VBA macros and removing repeated manual data entry.
- Tracked aircraft electronic aggregates across CAT A to CAT D repair categories, working under zero-error handling protocols for confidential, high-value components.

PROJECTS

TailorMart | Next.js, React Native, Supabase, Cloudflare Workers

- Two-sided B2B marketplace running three clients — two Android apps and a Next.js storefront — on one Supabase Postgres with zero custom API layer. Row Level Security plus column privileges form the entire security boundary, and orders freeze address and product state at checkout to keep dispute history safe from later profile or catalog edits.

World Monitor | TypeScript, Vite, Tauri

- Security contributor to a real-time global intelligence dashboard (65k+ stars, 115+ contributors). Closed a link-handler hole letting unsafe URL schemes execute in the desktop app (#720, #723), and propagated a stream-error fix across all 19 locale translations (#759).

Snap2Fix | Next.js, React Native, Supabase

- Public Next.js portal plus a React Native app for technicians, admins and super-admins on one real-time backend. Gemini classifies free-text complaints by department with a confidence score, backed by a floor-and-type routing engine when confidence drops, and a three-layer stack (FCM, Realtime, Notifee) delivers whether the app is open, backgrounded or killed.

LokalMusic | React Native (Expo), TypeScript, Zustand

- Fully client-side streaming app, no backend or login. Custom dual-queue playback state machine where the user queue overrides the context queue by priority, with Fisher-Yates shuffle, lazy cached stream URLs, and defensive parsing that keeps an inconsistent third-party API from crashing the player.

Grievance Resolver | FastAPI, LangGraph, Supabase, React

- Nine LangGraph agents automate citizen complaints end to end, with sentiment-driven urgency assigning real SLAs from 15 minutes for emergencies to days for routine cases, behind an LLM provider abstraction running Groq primary with OpenAI fallback.

Blood-O | React, TypeScript, Vite, Supabase

- Admin blood requests auto-match against registered donors by blood group and city, with all access enforced at the database layer through RLS policies scoped to auth.uid(), and live donor stats pushed over WebSocket subscriptions instead of polling.

EDUCATION

Guru Gobind Singh College of Engineering and Research Centre (SPPU)

July 2026

Bachelor of Engineering, Computer Engineering — CGPA 8.64 / 10

Nashik, India

RECOGNITION

Top 10% at MumbaiHacks 2025 and HackWithMumbai 2025. Participant, OpenAI × NxtWave Buildathon, Maharashtra Regional Round.

Co-author, "Snap2Fix: Smart Complaint Management System", *Indian Journal of Multidisciplinary Research*, Vol. 6 Issue 3, 2026 (DOI 10.5281/zenodo.20783790).
